

## Aerial Work Platforms

Aerial Work Platforms - There are a variety of lift truck accessories presented on the market. They can help transform your forklift so that you could expand your ability to pick stuff up or finish clean up jobs and material handling with out difficulty.

Several of the accessories are specifically designed in order to fit on the forks themselves. Blade extensions for example, are used whenever you need a lot more fork length, which increases lifting capacity. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are one more kind used whenever transporting rolled material so as to make sure it does not roll off of the typical flat forks.

Examples of lifting attachments include pivoting and telescoping crane or boom accessories. They can come in several various styles and are normally designed for transferring lumber, poles, metal bars and various sort of bulky stuff. Other attachments like for example various kinds of hooks and hook plates are existing to lift stuff making use of a sling or chain. Magnetic lifters and slab lifters are other things which could be used along with hook accessories. Slab lifters are specialized accessories which are intended for carrying various materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which connect to your forklift so as to make transferring rolls of carpet easier. The attachment hooks onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are several kinds of forklift accessory intended for facility maintenance such as snow blades. These industrial forks could be attached to front end loaders and designed for moving materials like dirt, and mulch as well as snow. Other popular cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the forklift forks hook onto for sweeping big spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up fast and easy.

Material spreaders are other accessories utilized on lift trucks. These spreaders are handy for a range of applications such as spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory which lots of companies make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models presented that are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location utilizing the lift truck. Larger platform models have extra space for personnel to carry tools and other necessary items intended for the task. Normally work platforms are constructed of poly material or steel.
